8-BIT DIVISION

EXP NO: 4

AIM:

To write an assembly language program to implement 8-bit division using 8085 processor.

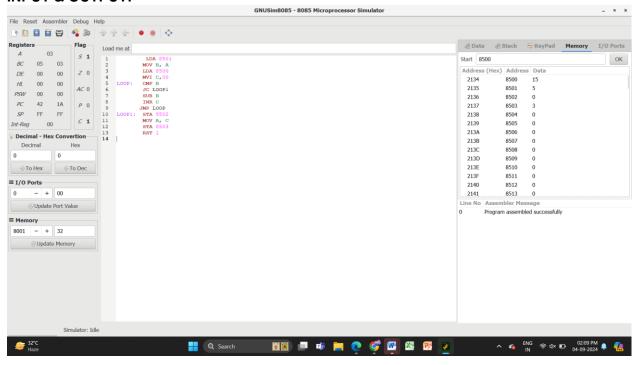

ALGORITHM:

- 1) Start the program by loading a register pair with the address of memory location.
- 2) Move the data to a register.
- 3) Get the second data and load it into the accumulator.
- 4) Subtract the two register contents.
- 5) Increment the value of the carry.
- 6) Check whether the repeated subtraction is over.
- 7) Store the value of quotient and the reminder in the memory location.
- 8) Halt.

PROGRAM:

LDA 8501 MOV B, A LDA 8500 MVI C,00 LOOP: CMP B JC LOOP1 SUB B INR C JMP LOOP LOOP1: STA 8502 MOV A, C STA 8503 RST 1

INPUT & OUTPUT:

RESULT: Thus the program was executed successfully using 8085 processor simulator.
